NRO REVIEW COMPLETED

6 January 1963

MEMORANDUM FOR : Chief, Communications Staff, CSA  
Chief, Development Division, CSA  
Chief, Material Division, CSA  
Chief, Operations Division, CSA  
Assistant Director, OSA-III/B

SUBJECT : Review of U-2 Electronics Equipment

1. In connection with a continuing requirement to update and expand the capability of the electronic devices carried by the U-2, we have permission to proceed with a review of all [redacted] collection equipment carried by the aircraft. The objectives of this review will be to determine (1) which equipments are necessary in their present form, (2) whether some overlapping functions may be combined or simplified and (3) whether the present equipments have enough capability in the present environment. The end result of this review will be in the form of recommendations for a development program which will permit updating and extending the useful life of the U-2 insofar as the electronics contributes to it.
